PART ONE

Superior and extraordinary

JGAURORA A4 competitively made by technology power

PRODUCT PARAMETERS

PARAMETERS

Model No	A4	Machine Weight	17kg
Nozzle size	0.4mm	Build Dimensions	150x140x140mm
Layer thickness	0.1-0.3mm	Printing Resolution	0.1-0.3mm
Machine Size	432x395x418mm	Material support	PLA TPU
Filament diameter	1.75mm	Print Speed	10-150mm/s
Operate System	Windows Linux Mac	Input Formats	STL OBJ G-Code
Language	Chinese/English	Packing Weight	21kg
Packing Size	510*530*540mm	Environmental Requirements	10-30°C , humidity 20-50%

Characteristics

PART TWO

3d printer child can operate
small body. strong power

01

Stable metal frame structure

Stability and durable

Adopts precision sheet metal liner, high strength plastic shapes, after more than 100 high-precision cutting process to create, solid like a rock.

02

Unique gapless feeding system

Make smooth printing

New gapless feeding structure design to achieve smooth retreat of filament. Compared to 3D printers on the market have a greater advantage, can adapt to a variety of print materials.

03

Dual-axis integrated motor

Speed up 30% stable and high speed printing

Bilateral double axis motor drive synchronization, contributes to high speed, precision control performance, increase stability

04

Unique bullet nozzle structure

Make smooth printing

Heated evenly, smooth feeding, and less wiredrawing

05

Multicolor option

Smart and fashion coexist, there's always one kind that you like

White

Red

Blue

05

Industrial design Extrordinary appearance

Light industrial design style, combining color with black, body stable and stylish, arc-shaped edge with fine design, rounded fuselage and streamlined aesthetic.

06

Resume print even power failure

Don't worry! We can resume printing even power off.

Hello, are you sure to continue?

yes or no

half print when power off

Print finished

07

Low-noise operation --- "quiet" endless

Through unremitting efforts , we've developed more quiet operation structure , guarantee office and home not be affected

Energy saving environmental protection
24 hours continuous printing < 1 kilowatt hour

Falling leaf Country night

Page turning

Talking

car horns

08

Concealed material rack design

Effective protection of filament, no affected by moisture, and to make the body more beautiful

01/

Platform modular design

After the model is printed, can take out the platform, remove the model easily.

02/

Opening and closing window design

Open the lid --- better observe the model,
Close the lid --- ensure more stable print

03/

Aviation material switch button
top grade textured, durable,
colorfast

04/

Sealing extruder structure
Adding a protective cover for high temperature
nozzle,, solve the security problems caused by
accidentally touching the nozzle
