Power Output is conducted. The antenna(s) used for this transmitter must not be co-located with any other transmitters except in accordance with FCC multi-transmitter product procedures. SAR compliance for body- worn operating configurations is limited to belt-clips and holsters that have no metallic components in the assembly and cause the device to operate with the minimum separation distance of 10 mm, as described in this filing. End-users must be informed of the body- worn operating requirements for satisfying RF exposure compliance. The highest reported SAR for head, body-worn accessory, product specific (wireless router) and simultaneous transmission exposure conditions are 0.14 W/kg, 0.15 W/kg, 0.15 W/kg and 1.40 W/kg, respectively.

CC: This device is certified pursuant to two different Part 15 rules sections.
