

BC35B CAR HUMIDIFIER INSTRUCTION MANUAL

Thanks for choosing our Car Humidifier. This manual is written to help you to learn how to use the product. Please read the manual carefully before use.

I. Introduction

This product is used for charging mobile device and humidifying with fragrance. It adopt atomization technology with frequency 110KHZ to convert the water to droplet with diameter 6um and effectively rule out static electricity and dust, reduce the humidity in car, and moisturize the air. The uniform volatilization could bring comfortable feeling to skin. Charging device and humidifying are working at same time.

II. Product appearance schematic

Schematic Introduction

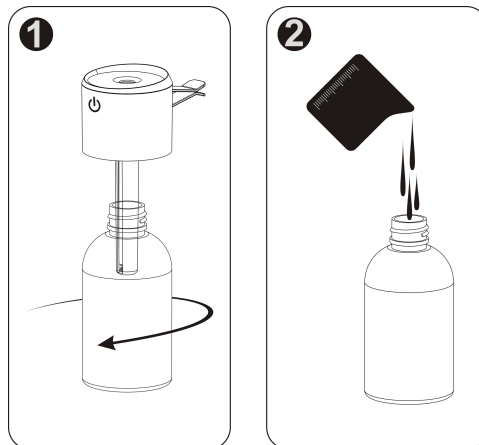

1. Exit of spray
2. Touch Switch Button
3. Water bottle (color reflected by indicator light: Standby in red, constant spray in blue, intermittent spray in purple)
4. Absorbent cotton bar
5. Air vent clip

III. Product character

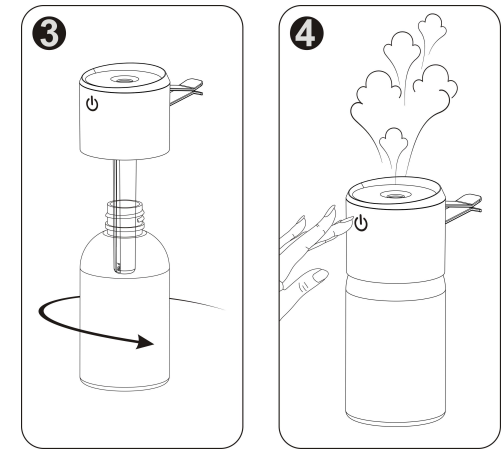

1. Support intermittent spray
2. Support constant humidification
3. Various essence or essential oil only 1 to 2 drops mixed with water
4. Support constant spray for 1H and turn to standby to prevent from dry burning.
5. Support intermittent spray for 2H and turn to standby to prevent from dry burning.
6. Support air vent clip direction adjustment(according to the direction of air conditioner wing)

IV. Operation Instruction

A. Using step:

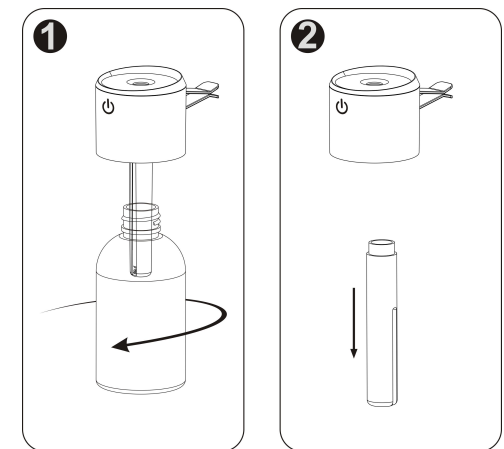

1. First to open the water tank
2. Drop suitable water(essence optional)

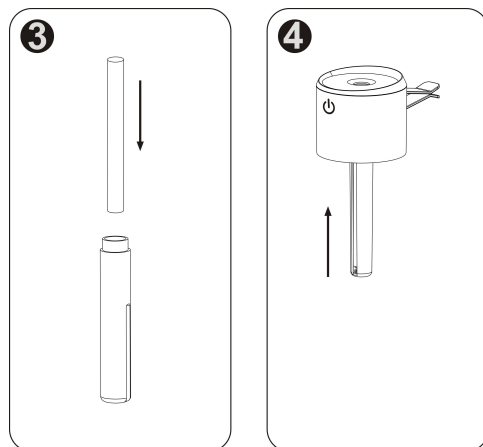

3. Install water tank
4. Clip the device to the air vent, plug the charger into cigarette lighter to get power while red indicator light is on. Single Touch the power button for constant spray, touch again for intermittent spray while light is turned to purple.

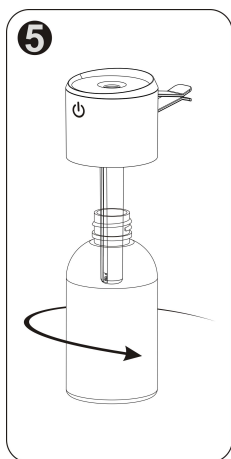

B. Replace the absorbent cotton bar

1. Open the water tank as picture
2. Pull down cotton bar vertically without undue force

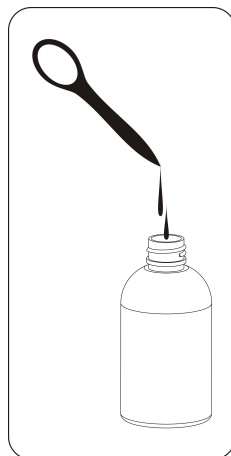

3. Put new cotton bar into the frame
4. Install the cotton bar vertically on the main body

5. Install water tank as picture
Finish the installation of cotton bar

C. Illustration of essential oil installation

Essential oil is less than 2 drops

Note: Pour 1 to 2 drops essential oil into the pure water and shake it well before using. Some essential oil with high concentration will leave dirt on the bottle, please use alcohol to clean it.

TIPS:

- a. This product is suggested to use distilled water or pure water for humidifier. If the spray shrinks, use a sponge stick(dipped into water with small amount of white vinegar) to press on the hole lightly and spin around 5-10 times.
- b. Before changing water, shutdown the humidifier that can increase the service life.
- c. Please change daily water and regular disinfection for humidifier.
- d. Please don't use undue force to clean it to prevent from damage to the atomization sheet.

VI. Technology parameter

Rated working voltage	5V1A
Working temperature	0-45 degree

Working current	120MA-280MA
Working power	1W-3W
Spray capacity	<50ML/H
Essential oil	Support 1 to 2 drops
Intermittent mist spray	Support
Water tank capacity	100ML

VII. Use instruction and Caution

1. Do not switch to diffuser mode when the water tank is empty.
2. Please switch it off when pouring water to the bottle for long life
3. Clean and dry it completely before pack up.
4. This product is suggested to use distilled water or pure water for humidifier because tap water contains calcium, magnesium, etc and tends to be white powder during atomization which easily cause respiratory tract disease to people.
5. Better to change water and disinfect to prevent from germ.
6. Put it far away from children.
7. Clean the water on the spray hole when it is blocked by plentiful water.
8. The content of the water tank is 100ml. Better to put water less than 80ml.

VIII. Accessory

1. Main body
2. Manual
