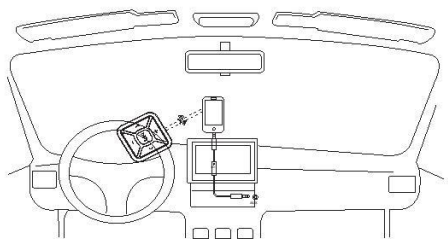
Bluetooth Hands-free Button User Manual

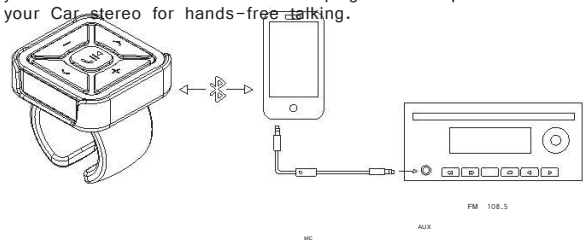
The Bluetooth Hands-free Button puts media control and Hands-free calling at your ngertips with a single press of a button. Attach the button to your steering wheel or dashboard to safely and conveniently control the functions even when your smartphone is out of reach. Answer/Hang up, play/pause, forward/backtrack, and adjust volume even while your phone is in your pocket, purse, plugged into the wall, or elsewhere up to 40 feet away!

Compatibility

Apple iOS devices supporting Bluetooth 3.0 and later;
Android devices that support OS 4.0 or later.



Use the included mount to attach the BT Button to your steering wheel or onto bicycle handlebars, allowing you to keep your eyes on the road and your hands on the wheel. You can plug the Microphone Audio cable into your Car stereo for hands-free talking.



Bluetooth Connection

1. Make sure your phone or tablet Bluetooth is “On”.
2. Check for “BT009” on the list of detected devices.
3. Select “BT009” and wait for the pop up menu.
4. Tap the “Pair” button on the pop up menu.

Using Multimedia Functions

1- Open native audio or video apps.
2- To play/pause.
3- Adjust volume and skip tracks.
