### BT remote control pairing

Long press the [VOL-] and [OK] until the indicator on the remote flashes. After the pairing is successful, it will automatically exit this menu.

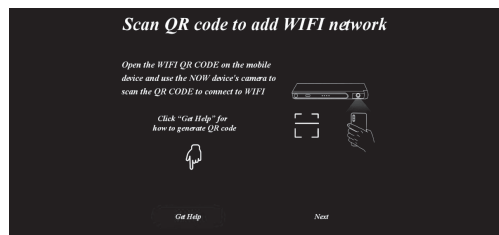

### Connect to Network

Connect your device with the Internet to make video calls, access movies, TV shows, games and apps.

### Scan QR code to connect to WiFi network

1. After the remote control is successfully paired, the screen will display the QR code to connect to the WiFi wizard menu, turn on the camera of the MECOOL NOW device and open the connected WiFi QR code on the mobile device (mobile phone, tablet, etc.). If you don't know how to get the QR code Code, click the Get Help button on the screen to view the help and then click Next.

2. Click the "Scan" button to enter the scan code page, move the QR code displayed on the mobile device to about 15CM from the MECOOL NOW camera and the device will automatically scan the code to connect to WiFi. After successfully connecting to WiFi, it will automatically exit and enter the system language selection interface.

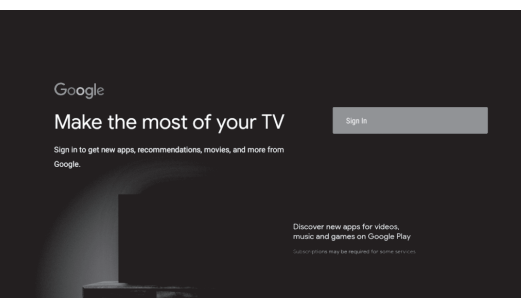

### Note:

- If the device is connected to a wired network, it will automatically enter the system language selection interface and will not enter the wizard menu for scanning the QR code to connect to WiFi.
- For optimal wireless performance. Please don't put the microwave oven and other equipment near MECOOL NOW, as it impacts signal strength to the device and remote control.

### Sign in to your google account

To use Google Assistant, Google play store, you must sign in to your Google Account.

### Use Google Duo for video calls

Google Duo is a free service. To use Duo across multiple devices and platforms, you need a Google Account.

### Set up Duo on your Android TV

1. On your Android TV, open Google Duo.
2. Select your account to sign in.
3. Select access permission.
4. Follow the on-screen instructions to complete setup.

### Find & invite contacts

You can call to someone through Duo if they're in your contacts. If they're not in your contacts but they use Duo, you can add them.

1. You'll see someone in your contacts in Duo, or enter their name or phone number in the search box.
2. If you can't find someone in the app's contacts. Make sure your device is the latest version of Duo, and the person you want to call should download the Duo app.
3. If one of your contacts doesn't use Google Duo, you can invite them to download the apps.

### Make a call

1. In Duo, search for a contact or group on the left.
  2. Select the contact you want to call.
  3. At the bottom, select Video call or Voice call.
- Tip:** When the device enters the system after shutting down or restarting and the DUO app has not been opened, if someone calls you, there will be no pop-up box for the incoming call. Instead, the speaker will alert you of missed calls, and the system will automatically open the DUO app. The first contact on the left side of the list in the DUO app will show the contact who made the call.

### One-touch dial or answer

1. When you need to call the last contact, you can press the **Google Duo** shortcut Key on the remote control or the **Google Duo** button on the device to quickly open DUO, and press the **Google Duo** shortcut key or the **Google Duo** button again, it will automatically make a video call.
  2. When you are using other applications and do not open DUO, someone calls you, the device will play a ringtone through the speaker after receiving an incoming call, and the LED lights on the device will display in a color loop. At the same time, an incoming call answering box will appear on the screen, you can press the **Google Duo** shortcut key or the **Google Duo** button on the device to quickly answer the call.
  3. A ringtone will be coming out from the speaker on the device when someone makes a call to you, even the device is in the sleep-mode, and the LED light in front of the device will flashes in a color loop. At the same time, an incoming call answering box will appear on the screen, you can press the **Google Duo** shortcut key or the **Google Duo** button on the device to quickly answer the call.
- Tips:** If the user's TV not supports the CEC function, KA2 can not wake up automatically under the sleep-mode when coming a call.

### Learn about Google Duo

### How to use Camera App

You can open Camera APP from the Apps list or press Camera shortcut key on the remote control.

### Take a picture

With the camera app open, press the Camera shortcut key to take a picture or move the cursor to the capture button, then press OK to take a picture.

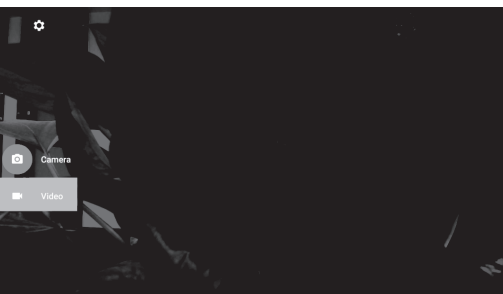

### Set up time-lapse

If you want to set the delay camera function, move the cursor to the **Time-lapse** position in the upper right corner of the screen, press the OK key and the setting menu will appear, press the down arrow key to move the cursor to the clock icon, and press the OK key continuously to set different delays. Time (sequentially 3s, 10s, close).

### Switch camera or video mode

In camera mode, press the left arrow key of the remote control to display the camera and video menus, press the down key to move the cursor to the video position, and press the OK key again to switch to video mode.

### Take a video

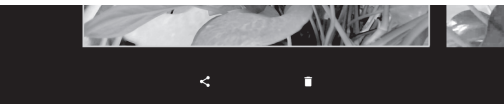

In video mode, press the Camera shortcut key to start recording or press the record button to start recording, press the stop button to finish recording

### View pictures and videos

After taking a picture or recording a video, press the right arrow key on the remote control to enter the file list and move the cursor to view different pictures or videos.

When the cursor moves to select a picture, you can press the OK key to zoom in and view the picture. When selecting a video, a pop-up box for selecting the player will appear after pressing the OK button. This video will be played after selection.

### Share pictures and videos

If you want to share pictures or videos to other devices, move the cursor to the share button at the bottom of the screen, press OK and a sharing menu will pop up on the screen. You can choose to share to other devices via Bluetooth or Google Duo.

**Tips:** Because iOS is not compatible with the Bluetooth of the Android system, when using Bluetooth sharing, you can only share to Android devices. When sharing to iOS devices, you can share with the contacts in the list through the DUO app.

### How to use TikTok

You can open TikTok APP from the Home page or enter the APPS-Sideload Launcher to find the TikTok APP to open and use.

The TikTok APP in the device is mobile phone version which can not support the cursor operation by remote control. When using it, you need to press the **Mouse** button on the remote control to turn on the mouse mode for operation.  
**Tips:** After turning on the mouse, the VOL+ and VOL- keys will switch to the auxiliary function of the mouse. Is not able to adjust the volume. After the mouse is turned off, the volume can be adjusted normally.

### Setting Up Your Account

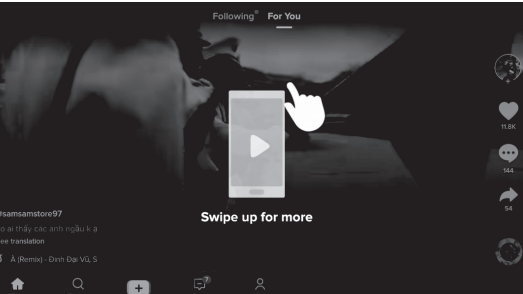

#### Log in or sign up

1. When you open TikTok, a login page will pop up on the screen. You can log in via Facebook, Gmail, Instagram, or Twitter, or add a standard username and password. Press the **Mouse** button on the remote control to turn on the mouse mode and press the arrow keys to move the mouse pointer. Go to the location of the login account you want to use, and press the OK button to start setting up login.
2. Register a Tiktok account first if you don't have one. Go into Air-mouse mode to sign up with Facebook, Gmail, Google, Twitter or by your mobile phone or email.

### View the video

TikTok will send you random trending videos before you don't have any followers. The videos will become more personalized to your interests as you begin following and interacting with more people.  
Switch the videos by Air-mouse mode when watching.  
Move the mouse-pointer to the middle area of the screen through the arrow keys.

1. First press and hold the VOL- button on the remote control without releasing it and then press the up button once, the video will slide up and out of the screen and the new video will be displayed.

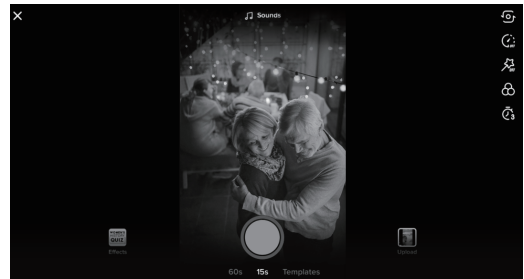

2. Similarly, press and hold the VOL+ key without releasing it and then press the down key once, the video will slide down out of the screen and display the new video.
3. If you like a video very much and want to see if users have more liked posts, swipe left to switch to their profile.

### How to Post on TikTok

#### Set up your shot and pick out special effects

Click the **Camera** button to enter camera mode. On the right side of the screen, you'll also see icons for the following:

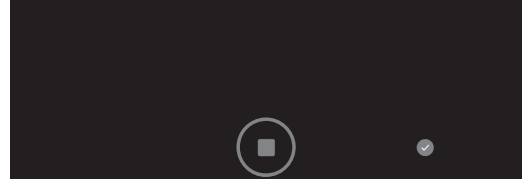

1. Speed: Allows you to record your video in slow motion or sped up.
2. Beauty: An AR filter that can hide blemishes and smooth out your skin.
3. Filters: Lets you change the color filter of the camera.
4. Timer: Allows you to set an auto-record countdown if you want to film hands-free.

Under the camera, you can set the time limit for your video or tap Photo Template to create a photo slideshow instead of a video.

### Record the video

Once you're ready, press and hold the red record button. You can either record your video all at once or in pieces.

If you want to fit different shots in each video or record it in pieces, simply hold the record button for each segment, then let go, then press and hold it again when you're ready for your next shot.

### Make final edits and post

When you're done recording the video, you'll still be able to add a musical overlay, filters, and other basic special effects. You can also add stickers and text overlays on top of the video.

### FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
• Reorient or relocate the receiving antenna.  
• Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator&your body.
