

HDTV Wire

Quick Start Guide

Rev. 1.0

Introduction

Thanks for choosing PTVwire! The PTVwire contains the cutting-edge PTVwire technology, and firmware upgrade will be provided accordingly in order to compatible with latest devices. Please read the installation guide below to setup your PTVwire. Let's enjoy mirroring!

support@ptvdisplay.com

Hardware Installation

Please follow below steps to setup PTVwire :

- (1) Connect PTVwire to your TV (Monitor or Projector)
- (2) Connect the USB type-A plug with an external (5V) adapter.
- (3) Connect the lightning plug with your iOS* device

* Support iOS8 and above

- (4) If the HDMI source is set correctly, you should see the PTVwire setup screen on TV
- (5) Wait for a few seconds for initialization*, the screen of your iOS device will be shown on TV.

* Some iOS devices may popup "This accessory may not be supported". Please feel at ease to use as this is a normal notification.

Firmware Upgrade

(1) Insert a paper clip into the hole on the PTVwire dongle, and push the key inside the hole to enable HotSpot mode (Internet)

(2) Enable “Personal HotSpot” of your iOS* device

Note: Cellular (3G/4G) data is needed at your iOS device,

(3) Download “EZCast” App, launch it. Click the “Wire” Button on the right to establish connection, and then click the “Menu” Button on the left

(4) Click the “Firmware OTA” button

Note: Please DO NOT power off during upgrade.
