Customer Service

Support@MiraScreen.com

We'd love to hear from you!

Hardware Installation

1. Turn on your TV and power up the MiraScreen dongle by connecting the USB cable from the dongle to a USB adapter (5V1A). Please place the WiFi receiver at a location with good WiFi reception.
2. Connect the MiraScreen dongle directly into an HDTV input port on your TV.
3. Set your TV's Source/Input selection to HDTV input port connected to the MiraScreen dongle
4. Your MiraScreen dongle now starts up and will display instructions on your TV screen. Follow the instructions to complete setup

Setup for iOS (iPhone/iPad)

1

2

3

4

1. Wait for MiraScreen main screen after power on.

1

2

3

4

1. Wait for MiraScreen main screen after power on.

2. For Windows 8.1, execute “Windows Start Menu > Settings > PC and devices > Devices > Add a device”, and then search for MiraScreen dongle.

For Windows 10, execute “Windows Start Menu > Settings > Connected devices > Add a printer or scanner”, and then search for MiraScreen dongle.

3. Your Windows screen will be shown on your TV through MiraScreen connection.

Companion Application, EZMira

Download and install EZMira to your Windows from <https://MiraScreen.com/app-download>.

Then you may mirror Windows to MiraScreen using EZMira as below.

Wireless 2.4GHz and 5GHz network(Available for 5G dongles only)

MiraScreen will operate at the same wireless band as the router. Therefore, please connect MiraScreen to an 5G wireless home router for using 5GHz WiFi Band

MiraScreen's WiFi SSID and Password are shown on the TV screen. You may connect your mobile phone or laptop to the MiraScreen 's WiFi SSID, and then setup accordingly.

Setup for your MiraScreen

If MiraScreen connected to Home WiFi router, then please connect your phone or laptop to the same Home WiFi router. Launch web browser on your phone or laptop, then access the IP address (Shown on main screen) of MiraScreen to enter setup page.

2. If MiraScreen does NOT connected to any Home WiFi router, then please connect your phone or laptop to SSID of MiraScreen via WiFi. Launch web browser on your phone or laptop, then access the IP address (<http://192.168.203.1>) of MiraScreen to enter setup page.

3. The setup page of MiraScreen will be shown on your phone or laptop.

Settings and Firmware Upgrade

1. Internet: Connect your MiraScreen to local Wi-Fi network.

Note: The connection between MiraScreen and your device may be disconnected when MiraScreen connects to local WiFi network instead.

2. Password: Change the password of MiraScreen

3. Resolution: Output resolution of MiraScreen

4. EZAir mode: Mirror only (recommended).

Mirror+streaming for iOS 11.1 and 11.2.

5. Upgrade: upgrade the firmware of MiraScreen.
