

GF - 07 enhanced magnetic locator

The instructions

Warm prompt: we are in pursuit of quality, practical, sound is clearer, more accurate positioning, standby time is longer, not blindly pursue low-end KengMeng consumers inferior products. Enhanced alarm locator is a base station positioning in a best cost-effective, higher requirements for high-end customers, let you really buy the rest assured, with enjoyable. Not some fake products; Through low inferior chip, the cost is low, quality is not guaranteed.

Product advantage:

1, is the only similar products of all mobile phones on the map to view the query to the location and computer platform position trajectory, also can be directly reply messages in Chinese position.

2. In the first base station positioning on the basis of the original joined Google maps positioning, greatly reduces the error range of the product.

3. Due to the joined Google positioning mode, the product positioning function now support abroad.

4. If we can call 10086 opened around listening to sound more friendship number per month, it's only a number five yuan a month to check how long don't money.

5. This product does not need to cost platform, life-long free of charge. Just send a message to the alarm locator, can respond to the following address information in Chinese and Google maps connection, simple operation, one pace reaches the designated position.

6. This product built-in powerful magnet adsorption function, need not you worry again put problem, as long as there is metal, you can directly put up, the magnet will automatically adsorption, more convenient installation you put the position

6. This product is the only market with the function of charge automatically boot, connect the power supply, when the alarm locator electricity used up and products after shutdown, call the product will be automatically switched on and continue to recharge, warning, charging must insert SIM card

7. Our website [HTTP; // / gpsui.net](http://gpsui.net)

Regardless of alarm locator on the cart, children bag, the old man's pocket, valuables bag, can through the mobile phone to send SMS alarm locator, query alarm locator location, convenient you to monitor all the way, to master the location of the object in real time.

Method of use:

1. Appearance size: 3.5 cm * 2.0 cm * 1.4 cm (L * W * H)

2. Charging input InputAC110-220 v50/60 hz

3. The charging output: OutputDC5.0 V 300-500 ma

4. The machine battery: 3.7 V 400 mah Li - ion '

5. Standby time: 12 days. Working time 4 to 6 days

6. The expansion card; Mini TF card

7. The video video; 320 * 240

8. The photo size; 640 * 480

9. Talk: 150-180 minutes

10. Format: GSM/GPRS

11.. Storage temperature: - 40 ° C to + 85 ° C

12. Working temperature - 20 ° C to + 55 ° C

13. Humidity range 5% - 95% non - condensing

14, GPRS: Upload60, TCP/IP

15, working voltage: 3.4-4.2 V DC

16 standby current: : material 2.5 mA

17, open the acoustic current: material 30 ma

18, call: current material 150 ma

19, GSM positioning time: 25 seconds

Basic parameters: spectrum GSM850/900/1800/1900 MHZ

Supported countries: China Britain France Germany Netherlands Italy Spain Brazil, Portugal, Denmark Russia Poland Turkey Hungary Thailand Indonesia Malaysia Vietnam myanmar Pakistan, Iraq, Saudi Arabia, Greece the kazakhstan Mongolia dubai, etc..

Often encounter problems:

1. The host can't get through

Answer: must insert SIM boot will enable mobile phone signal, after the mobile phone card, so you only need to turn after the reboot the machine. Still have even if your mobile phone card is not in the server, no signal.

2. TF memory card cannot be stored?

A: check whether the TF memory card is wrong, if there is no question about the TF card can put the TF memory card format to retry.

3 can't charge?

Answer: to charging the GSM card, if you are unable to realize charging is not.

4 what is the main control cell phone?

A: is that you need to use it to monitor and alarm system of mobile phone.

Special warning: when the deficiency of alarm locator (power under 5%) please charge in time, such as the battery is in a state of loss of electricity for a long time, will inevitably cause the battery to discharge depth affect battery performance and life, serious battery charge it into electricity or scrap, such as alarm locator when not in use, please put the battery charged to 60% - 80%, disconnect the power of the locator, in storage, not for a long time (three months) please the locator to supplement the electric regularly, in order to protect the battery, in order to you better use this machine, please read and follow the above, thanks
