UPA-USB Device Programmer Software v1.2 or later

UPA-USB Logic Analyzer Software v1.2 or later

UPA-USB CAN Bus Analyzer v 1.2 or later

upausb.sys driver can not be used with UPA-USB Device Programmer Software v1.1

Installation

1. Uninstall older version, then run setup.exe to install the new one

2. Copy uuprog.lic file to uuprog software folder - this file is attached to the software registration email

if you have no uuprog.lic - contact support@elrasoft.com

3. install/update the usb driver

If the uuprog software will be installed for first time to this computer you have to install the usb driver

See UsbDriverInstallationGuide.chm located in device programmer help folder for instructions.

UPA-USB Serial Programmer (UUSP) Activation

An UUSP must be activated before using

How to get activation key:

- Install and run UPA-USB device programmer software (UUPROG) v1.3.0.14 or later

- Attach the UUSP to your PC USB port

- Install or update USB driver - upausb.sys if it is needed

- When activation dialog is shown click "Get Activation" button or if you have no Internet access, copy and save Hardware ID

- Login using your ELRASOFT Client Center user name and password - see your software registration email

- if it is needed, enter the hardware ID and click "Get Activation" button

- Copy/paste obtained activation key and user name to UUPROG activation dialog and click "Activate" button
