Description of parts

1, Eject: Slide this switch to open the cassette holder.

2, Volume: Adjusts the volume of the headphones and USB

USB Cassette Player

connection.

3, Headphones : You can connect 1/8" headphones here.

For with LP input model, it's also for LP or other analogue audio device input audio with 3.5mm to 2RCA audio cable.

4, USB Connection: Use the included USB cable to connect USB Cassette Player to your computer . For transferring your recordings to your computer, we have provided a software package on the included CD.

5, Play: Press to play the tape

6, Stop: Press to stop the tape

7, FF/REW: Press to fast forward or rewind the tape

Note that these buttons will become "reversed" when the tape changes direction

8, DIR: Selects the direction of tape playback. This is useful if you want to play the other side of the tape without having to eject it.

9, Play Mode: Selects what the tape does when it reaches the end of a side. When set to the "loop" icon, the tape will automatically switch direction and begin playing the opposite side when one side has finished. When set to the single arrow icon, the tape will simply stop when a side has finished.

Note: If you buy the cassette with phono input model, please connect your phono audio output with cassette Headphone slot by included 3.5mm to 2RCA audio cable. Then you can do it follow below steps.

Software Installation

Insert the Software CD into the CD drive, and read it. Please double click the "Audacity.exe" file and follow the onscreen instructions to install the software. Once the software is installed, connect the **USB Cassette Player** to your computer with USB cable to transfer your audio.

USB Cassette Player

Audacity Software Guide

Please insert the Software CD into the CD drive, and read it.

Double click "Audacity.exe" file, choose your language and click "OK", then click "Next".

Click "Next" and select the folder that you want to install the Audacity in, then click "Next". And tick "Create a desktop icon" then click "Next" and "Install" to install the software.

Please click "Next", and "Finish" to complete the installation.

Now, you need to set software for capturing and editing audio. Double click "Audacity" icon on your desktop, and show you Audacity software panel. Please click "Edit" key on the software panel, and select "Preferences". Please set recording device to be "USB PnP Audio Device", and channels to "2(Stereo)".

And click the "Recording" selection of left side, and tick "Software Playthrough: Listen while recording or monitoring new track (uncheck when recording "Stereo mix")".

Now, you can start to record analog audio to be digital MP3 format file. Begin playing your cassette and click red record key (see below) to start recording audio - when you want to finish, click the yellow stop key.

Now you can save the recording file into MP3. Click "File", and select "Export". You need to write a file name and click "Save". You still need to provide some additional information about your recording as below, then get your digital music file.

You can now use the file for your iPod by iTunes or other MP3 player.
