2.GETTING STARTED

2.1 Charging the battery

Connect the supplied USB cable to the Type-C connector of the tablet. Connect the cable to the adapter and the adapter to the mains. The tablet begins to charge and the battery indicator is shown on the screen.

2.2 Long press the ON / OFF button to start.

WARNING:

Charge the battery fully during the first charge and prior to first use.

2. ERSTE SCHRITTE

2.1 Aufladen des Akkus

Schließen Sie das mitgelieferte USB-Kabel an den Typ-C-Anschluss des Tablets an. Verbinden Sie das Kabel mit dem Adapter und den Adapter mit dem Stromnetz.

Das Tablet beginnt zu laden und die Akkuanzeige wird auf dem Bildschirm angezeigt.

2.2 Drücken Sie zum Starten lang die Taste EIN / AUS.

WARNUNG:

Laden Sie den Akku beim ersten Aufladen und vor der ersten Verwendung vollständig auf.

2 .CÓMO EMPEZAR

2.1 Cargar la batería

Conecte el cable USB suministrado al conector tipo C de la tableta.

Conecte el cable al adaptador y el adaptador a la red.

La tableta comienza a cargarse y el indicador de batería se muestra en la pantalla.

2.2 Mantenga presionado el botón de reposo/activación para comenzar.

ADVERTENCIA:

Cargue la batería completamente durante la primera carga y antes del primer uso.

2. COME INIZIARE

2.1 Caricare la batteria

Collegare il cavo USB in dotazione al connettore Type-C sul tablet.

Collegare il cavo all'adattatore e l'adattatore alla rete.

Il tablet inizia a caricarsi e l'indicatore della batteria viene visualizzato sullo schermo.

2.2 Tenere premuto il pulsante Sleep / Wake per iniziare.

AVVERTIMENTO:

Caricare completamente la batteria durante la prima carica e prima del primo utilizzo.

2. ПЕРВОЕ ВКЛЮЧЕНИЕ

2.1 Зарядите батарею

Подключите идущий в комплекте USB-кабель к Type-C разъему планшета. Подключите кабель к зарядному устройству, а зарядное устройство в розетку. Планшет начнет процесс зарядки, вы увидите индикацию на дисплее.

2.2 На несколько секунд зажмите кнопку питания для включения.

ВАЖНО:

Полностью зарядите батарею перед первым использованием планшета.

EN

Precautions for this device

A.- Information relating to the safety of users and non-users:

Compliance with the specific restrictions of use of certain places (hospitals, planes, petrol stations, schools, etc.).

For mobile phones, reminder of the prohibition of the use of a phone held in the hand by the driver of a vehicle in circulation.

Precautions to be taken by wearers of electronic implants (pacemakers, insulin pumps, neurostimulators, etc.) concerning in particular the distance between the radio equipment and the implant (15 centimetres in the case of the strongest sources of exposure such as mobile phones).

B. - Information on the behaviour to be adopted to reduce exposure to radiation emitted by radio equipment:

Use radio equipment under good reception conditions to reduce the amount of radiation received

Use a hands-free kit or speakerphone, if suitable for radio equipment.

Make reasonable use of radio equipment such as mobile phones by children and adolescents, for example by avoiding night-time communications and limiting the frequency and duration of calls.

Keep radio equipment away from pregnant women's wombs.

Keeping radio equipment away from the lower abdomen of teenagers.

FR

Précautions d'utilisation de l'équipement

A.- Informations relatives à la sécurité des personnes utilisatrices ou non:

Respect des restrictions d'usage spécifiques à certains lieux(hôpitaux, avions, stations-service, établissements scolaires...).

Pour les téléphones mobiles, rappel de l'interdiction de l'usage d'un téléphone tenu en main par le conducteur d'un véhicule en circulation.

Précautions à prendre par les porteurs d'implants électroniques(stimulateurs cardiaques, pompes à insuline, neurostimulateurs...)concernant notamment la distance entre l'équipement radioélectrique et l'implant(15 centimètres dans le cas des sources d'exposition les plus fortes comme les téléphones mobiles).

B. - Informations sur les comportements à adopter pour réduire l'exposition aux rayonnements émis par les équipements radioélectriques:

Utiliser l'équipement radioélectrique dans de bonnes conditions de réception pour diminuer la quantité de rayonnements reçus.

Utiliser l'équipement radioélectrique dans de bonnes conditions de réception pour diminuer la quantité de rayonnements reçus.

Utiliser un kit mains-libres ou un haut-parleur, si adapté à l'équipement radioélectrique.

Faire un usage raisonné des équipements radioélectriques comme le téléphone mobile, par les enfants et les adolescents, par exemple en évitant les communications nocturnes et en limitant la fréquence et la durée des appels.

Eloigner les équipements radioélectriques du ventre des femmes enceintes.

Eloigner les équipements radioélectriques du bas-ventre des adolescents.

Warning

Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss.

To prevent possible hearing damage when using a headset, do not listen to sound at high volume for long periods.

The product shall only be connected to a USB interface of version USB2.0.

The power delivered by the charger must be between min 15 Watts required by the radio equipment, and max 18 Watts in order to achieve the maximum charging speed.

The device can be used in locations with an ambient temperature of -10°C - 60°C . You can store the device at an ambient temperature of -20°C to 70°C . Using or storing the device outside of the recommended temperature range may damage the device or reduce the battery's lifespan.

This product can be used across EU member states, but with restriction.

Restrictions in the 5 GHz band:

According to Article 10 (10) of Directive 2014/53/EU, the packaging shows that this radio equipment will be subject to some restrictions when placed on the market in Belgium (BE), Bulgaria (BG),Czech Republic (CZ) ,Denmark (DK),Germany (DE),Estonia (EE),Ireland (IE),Greece (EL),Spain(ES),France (FR),Croatia (HR),Italy (IT),Cyprus (CY),Latvia (LV), Lithuania(LT),Luxembourg (LU),Hungary (HU),Malta (MT),Netherlands (NL),Austria(AT), Poland (PL),Portugal (PT),Romania (RO), Slovenia (SI),Slovakia (SK),Finland (FI),Sweden (SE),the United Kingdom (UK),Turkey (TR),Norway(NO),Switzerland (CH),Iceland (IS),and Liechtenstein (LI).

BE	BG	CZ	DK	DE	EE	IE	EL
ES	FR	HR	IT	CY	LV	LT	LU
HU	MT	NL	AT	PL	PT	RO	SI
SK	FI	SE	NO	IS	LI	CH	TR

The WLAN function for this device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range.

During use, the actual SAR values for this device are usually well below the values stated in report. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call.

The lower the power output of the device, the lower its SAR value. If you are not using an approved accessory ensure that whatever product is used is free of any metal and that it positions the phone the indicated distance away from the body. Please use the device at a distance of 0.5cm from your body. Organizations such as the World Health Organization has stated that, if people are concerned and want to reduce their exposure they could use a hands-free device to keep the phone away from the head and body during phone calls or reduce the amount of time spent on the phone.

Health and Safety

Warning! To avoid electric shock and damage to your device, do not charge device while it is wet or in an area where it could get wet. Do not handle device, charger or cords with wet hands while charging.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Correct disposal

This marking on the product accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste.

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste.

Care for the environment! Must not be discarded with household waste!

SAR: The device complies with RF specifications when the device is used at 5mm from your body (SAR limit 2.0 W/Kg). The device is in compliance with the requirements. For the specific SAR value of the product, please refer to the information on the Safety Prompt Card or log in to the official website of ulefone for inquiry.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules that devices comply with two main conditions:

- 1.They must not cause harmful interference.
- 2.They must accept any interference received,including that which may cause undesired operation.

This product meets the government's requirements for exposure to radio waves.The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF exposure information and statement the SAR limit of USA(FCC)is1.6W/kg averaged over one gram of this device GQ8001(FCC ID: 2AT9T-8001)has been tested against this SAR limit.The SAR information related to this aspect can be viewed online at

<http://www.fcc.gov/oet/ea/fccid/>.Please use the device FCC ID number for search.This device was tested for typical operations 10mm from the body. To maintain compliance with FCC RF exposure requirements,10mm separation distance should maintained to the user's bodies.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

IC Caution

EN

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s).

Operation is subject to the following two main conditions:

- 1.They must not cause harmful interference.
- 2.They must accept any interference received, including that which may cause undesired operation.

SAR Statement:Mobile Phone has been tested and meets applicable limits for radio frequency (RF) exposure.Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy.The SAR limit is 1.6 watts per kilogram in Canada that set the limit averaged over 1 gram of tissue.During testing,Mobile Phone(IC: 28620-8001)radios are set to their highest transmission levels and placed in positions that simulate uses against the head,with no separation,and when worn or carried against the torso of the body,with 10mm separation.To reduce exposure to RF energy,use a hands-free option,such as the built-in speaker phone,the supplied headphones,or other similar accessories.Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines,in a manner that has not been tested or certified.Although this device has been tested to determine SAR in each band of operation,not all bands are available in all areas.Bands are dependent on your service provider's wireless and roaming networks.

The device for operation in the band 5150 to 5350 MHz is only for indoor use to reduce the potential for harmful interference to cochannel mobile satellite systems.Operation of 5250 to 5350 MHz is restricted to indoor use only.

FR

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

1.L'appareil ne doit pas produire de brouillage.

2.L'appareil doit accepter tout brouillage radioélectrique subi,même si le brouillage est susceptible d'en compromettre le fonctionnement.

Déclaration SAR:Le téléphone mobile a été testé et respecte les limites applicables à l'exposition aux radiofréquences (RF).Le débit d'absorption spécifique(DAS)désigne la vitesse à laquelle le corps absorbe l'énergie des radiofréquences.Au Canada,la limite du DAS est de 1.6watts par kilogramme,la moyenne étant calculée sur 1 gramme de tissu. Lors des tests,les radios de téléphones mobiles(IC : 28620-8001) sont réglées sur leur niveau d'émission le plus élevé et placées dans des positions simulant une utilisation contre la tête,sans séparation,et lorsqu'elles sont portées ou transportées contre le torse du corps,avec une séparation de 10 mm.Pour réduire l'exposition à l'énergie RF,utilisez une option mains libres, telle que le téléphone à haut-parleur intégré,les écouteurs fournis ou d'autres accessoires similaires.Les étuis comportant des pièces métalliques peuvent modifier les performances RF de l'appareil,y compris sa conformité avec les directives d'exposition aux RF,d'une manière qui n'a pas été testée ou certifiée.Bien que cet appareil ait été testé pour déterminer le DAS dans chaque bande de fonctionnement,toutes les bandes ne sont pas disponibles dans toutes les régions.Les bandes dépendent des réseaux sans fil et d'itinérance de votre fournisseur de services.

L'appareil fonctionnant dans la bande 5150 à 5350 MHz ne doit être utilisé qu'à l'intérieur afin de réduire le risque d'interférences nuisibles avec les systèmes mobiles par satellite à canal commun. L'utilisation de la bande 5250 à 5350 MHz est limitée à l'intérieur des bâtiments.
