

# U Disk Voice Recorder Manual

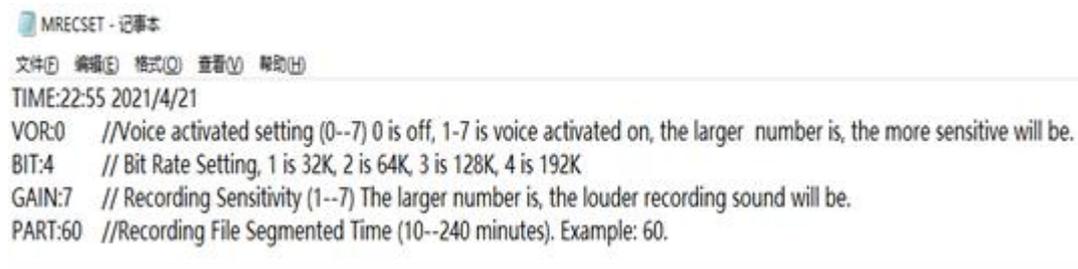

## Operating Instructions:

**Turn on:** Turn the machine switch to ON to turn on, switch to OFF to turn off

**Recording:** Turn on the red light to flash three times and turn off to start recording, turn off to save the recording and turn off! (The light is off during recording)

**Charging:** the red light is always on during charging, the blue light is always on when fully charged

**Recording parameter settings:** after connecting to the computer, there is a MRECSET.TXT file in the root directory of the removable disk, which is used to configure the default recording mode of the machine, as shown in the figure. The system time, voice control switch, recording bit rate, recording gain and recording file time sharing can be set.

As shown above:

TIME: 22:55 2021/4/21 (for the first use, please manually modify the local time! Be careful not to add other characters and spaces! In the windows10 system, F5 can be pressed to refresh the time)

VOR: 0 (as shown in the figure, 0 represents voice control off, 1-7 represents voice control on and voice control level)

BIT: 4 (as shown in the figure, 4 represents the recording quality of 192k)

GAIN: 7 (as shown in the figure, 7 represents the maximum recording gain)

PAPRT: 60 (as shown in the figure, 60 represents 60 minutes of recording is a file)

It adopts USB direct socket, win98 or above, no driver is needed, and it can be used as a U disk at will.

Recording format: WAV format (Note: 8GB means it has the ability to store sound files for about 100 hours at 192KBPS).
